

14.461: Part I: Technological Change

Daron Acemoglu

August 29, 2013

This course will cover selected topics in theoretical and empirical analysis of technological change. The course will draw both on Acemoglu, *Introduction to Modern Economic Growth*, Princeton University Press, 2008, and various research articles.

There will be three problem sets, which will count towards 30% of your final grade. The remaining 70% will be from a project due in November (exact time to be determined). This project will either be a proposal for a research article, or application of an empirical paper from a prearranged list, or a detailed critique and extension of an existing theoretical article. More details on the available choices for the project will be provided later.

Course details:

My e-mail: daron@MIT.edu.

Lectures: TuTh 1-2:30, E51-361.

Recitation: F 2:30-4, E51-361.

Teaching Assistant: Dana Foarta e-mail: ofoarta@MIT.EDU.
